Guidelines for Exhibitors

Using the guidelines shown below, please consider what risk there is to those building up trade stands and to members of the public during the show.
Outline the steps you propose to take to minimise that risk in your Risk Assessment Form.

Hazard	Who might be harmed	Is more needed to control the risk
Look only for hazards which you could reasonably expect to result in significant harm under the conditions in your workplace. Use the following examples as a guide: Slipping / tripping hazards Chemicals (e.g. battery acid) Moving parts of machinery (e.g. blades) Work at height (e.g. from mezzanine floors) Pressure systems Vehicles (e.g. fork lift trucks) Electricity Dust (e.g. from grinding) Fumes (e.g. vehicle engines) Manual handling Noise Livestock on stand Lifting operation	There is no need to list individuals by name – just think about groups of people doing similar work or who may be affected. Office Staff Maintenance personnel Contractors People sharing your work Operators Cleaners Members of the public Pay particular attention to: Staff with disabilities Visitors Inexperienced staff Lone workers – they may be more vulnerable	For the hazards listed, do the precautions already taken: • Meet the standards set by a legal requirement? • Comply with a recognised industry standard? • Represent good practice? • Reduce risk as far as reasonably practicable? Have you provided: • Adequate information, instruction or training? • Adequate systems or procedures? If so, then the risks are adequately controlled, but you need to indicate the precautions you have in place Where the risk is not adequately controlled, indicate what more you need to do
Fire Hazard e.g. combustible materials (rubbish, flammable substances, LPG etc.) and ignition sources (flames, smoking etc.)	As above	Means of escape fire detection and alarms. Fire fighting equipment and fire evacuation plan
